# INDEX TO VOLUME XII

Abadjieff, Boris. The relation between the complement fixation and the skin reactive antigens of the tubercle bacillus..... 355
Agar slants, The exudate from nutrient-, The so-called water of condensation. 179
Albus, W. R., and Holm, George E., The effect of surface tension upon the growth of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*..... 13
Alcohols and phenols, Relation between the chemical constitution and germicidal activity of the monohydric..... 303
Almy, L. H., and James, Lawrence H. A method for the study of the formation of volatile sulfur compounds by bacteria..... 319
Alvarez, Ruth Stone. A causative factor of "floaters" during the curing of olives..... 359
Ammonia and conductivity in nutrient gelatin cultures of putrefactive anaerobes. Parallelism between conductivity as applied to studies of bacterial metabolism. II..... 267
Anaerobes, Growth of spore-forming at 50°C..... 243
Association, Physiological studies of..... 343
*Aureus*, The genetic origin of *Staphylococcus albus*, and, from common ancestral strains. Studies in microbic heredity XI..... 409

*B. fusiformis* and related organisms, The infectivity and virulence of a filtrable phase in the life history of. Studies in microbic heredity VIII..... 279
*Bacillus coli*, The incidence of bacteriophage and of, susceptible to dissolution by the bacteriophage in urines. Presentation of cases of renal infection in which bacteriophage was used therapeutically. Bacteriophagy in urinary infection, Part I..... 203
Bacteria in the muscular tissues and blood of apparently normal animals..... 367
——, Note on the occurrence of, in oil-well brine samples..... 133
——, The butter aroma..... 333
——, A method for the study of the formation of volatile sulfur compounds by. 319
——, The use of the silica gel plate for demonstrating the occurrence and abundance of cellulose-decomposing..... 87
Bacterial suspensions, The influence of hydrogen ion concentration upon the viscosity of..... 97
—— cultures, A rapid method for the determination of sugar in..... 427
—— flagella, A method of staining..... 273
—— metabolism, Conductivity as applied to studies of. II. Parallelism between ammonia and conductivity in nutrient gelatin cultures of putrefactive anaerobes..... 267
—— population, The concentration of sea-water as affecting its..... 311
——, The, flora of serpentine soils..... 315
Bacteriological, A, study of canned salmon..... 181

Bacteriophage, The incidence of, and of *Bacillus coli* susceptible to dissolution by the bacteriophage in urines. Presentation of cases of renal infection in which bacteriophage was used therapeutically. Bacteriophagy in urinary infection, Part I..... 203
——, The, in relation to *Salmonella pullora* infection in the domestic fowl.... 245
Bacteriophagy in the bladder. Bacteriophagy in urinary infection. Part II. 225
—— in urinary infection. Part I. The incidence of bacteriophage and of *Bacillus coli* susceptible to dissolution by the bacteriophage in urines. Presentation of cases of renal infection in which bacteriophage was used therapeutically..... 203
—— in urinary infection. Part II. Bacteriophagy in the bladder..... 225
Beaudette, F. R., and Edwards, Philip R. The etiology of a canary bird epizootic..... 51
Bladder, Bacteriophagy in the. Bacteriophagy in urinary infection, Part II. 225
Buswell, A. M., and Neave, S. L. Note on the occurrence of bacteria in oil-well brine samples..... 133
Butter, The, aroma bacteria..... 333

Caldwell, Dorothy W., and Mellon, R. R. Studies in microbic heredity XI. The genetic origin of *Staphylococcus albus* and *aureus* from common ancestral strains..... 409
Canary bird epizootic, The etiology of..... 51
Carey, Cornelia, and Waksman, Selman A. The use of the silica gel plate for demonstrating the occurrence and abundance of cellulose-decomposing bacteria..... 87
Causative, A, factor of "floaters" during the curing of olives..... 359
Cellulose-decomposing bacteria, The use of the silica gel plate for demonstrating the occurrence and abundance of..... 87
Celluloses, Microörganisms concerned in the decomposition of, in the soil.... 57
Chocolate creams, The rôle of starch in the cracking of..... 275
Colorimetric determination of pH, The influence of sodium chloride on..... 263
Complement fixation, The relation between the, and the skin reactive antigens of the tubercle bacillus..... 355
Concentration, The, of sea-water as affecting its bacterial population..... 311
Conductivity as applied to studies of bacterial metabolism. II. Parallelism between ammonia and conductivity in nutrient gelatin cultures of putrefactive anaerobes..... 267

Dimitroff, Vladimir Triphon. *Spirillum Virginianum* Nov. Spec..... 19
Dimitroff, Vladimir T. Spirochaetes in Baltimore market oysters..... 135
Domestic fowl, The bacteriophage in relation to *Salmonella pullora* infection in the..... 245
Douglas, W. F., and Parsons, L. B. The influence of sodium chloride on the colorimetric determination of pH..... 263

Edwards, Philip R., and Beaudette, F. R. The etiology of a canary bird epizootic..... 51
Epizootic, The etiology of a canary bird..... 51

Etiology, The, of a canary bird epizootic..... 51
Exudate, The, from nutrient agar slants—The so-called water of condensation..... 179

Falk, I. S., and Harrison, R. W. The influence of hydrogen ion concentration upon the viscosity of bacterial suspensions..... 97
Fellers, Carl R. A bacteriological study of canned salmon..... 181
Floaters, A causative factor of, during the curing of olives..... 359
Fred, E. B., Stiles, H. R., and Peterson, W. H. A rapid method for the determination of sugar in bacterial cultures..... 427

Genetic, The, origin of *Staphylococcus albus* and *aureus* from common ancestral strains. Studies in microbic heredity XI..... 409
Gray, P. H. H. A method of staining bacterial flagella..... 273
Greer, Frank E. Growth of spore-forming anaerobes at 50°C..... 243
Growth of spore-forming anaerobes at 50°C..... 243

Harrison, R. W., and Falk, I. S. The influence of hydrogen ion concentration upon the viscosity of bacterial suspensions..... 97
Healy, Daniel J. The exudate from nutrient agar slants. The so-called water of condensation..... 179
Holm, George E., and Albus, W. R. The effect of surface tension upon the growth of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*..... 13
Hydrogen ion concentration, The influence of, upon the viscosity of bacterial suspensions..... 97

Infectivity, The, and virulence of a filtrable phase in the life history of *B. fusiformis* and related organisms..... 279
Influence, The, of hydrogen ion concentration upon the viscosity of bacterial suspensions..... 97
——, The, of sodium chloride on the colorimetric determination of pH..... 263

James, Lawrence H., and Almy, L. H. A method for the study of the formation of volatile sulfur compounds by bacteria..... 319

Krasnow, Frances, Rivkin, Helen, and Rosenberg, Margaret L. A method of studying the availability of synthetic media for streptococci..... 385

*Lactobacillus acidophilus*, The effect of surface tension upon the growth of, and *Lactobacillus bulgaricus*..... 13
*Lactobacillus bulgaricus*, The effect of surface tension upon the growth of *Lactobacillus acidophilus* and..... 13
Larkum, Newton W. Bacteriophagy in urinary infection. Part I. The incidence of bacteriophage and of *Bacillus coli* susceptible to dissolution by the bacteriophage in urines. Presentation of cases of renal infection in which bacteriophage was used therapeutically..... 203
——. Bacteriophagy in urinary infection. Part II. Bacteriophagy in the bladder..... 225

Lipman, Charles B. The bacterial flora of serpentine soils..... 315
——. The concentration of sea-water as affecting its bacterial population... 311

Media, Physiological studies of accessory and stimulating factors in certain.. 1
Mellon, Ralph R. Studies in microbic heredity. VIII. The infectivity and virulence of a filtrable phase in the life history of *B. fusiformis* and related organisms..... 279
——, and Caldwell, Dorothy W. Studies in microbic heredity. XI. The genetic origin of *Staphylococcus albus* and *aureus* from common ancestral strains..... 409
Method, A, for the study of the formation of volatile sulfur compounds by bacteria..... 319
Method, A, of staining bacterial flagella..... 273
——, A, of studying the availability of synthetic media for streptococci..... 385
Microbic heredity, Studies in. XI. The genetic origin of *Staphylococcus albus* and *aureus* from common ancestral strains..... 409
Microörganisms, A new apparatus for intermittent observations of physiological changes in cultures of..... 125
—— concerned in the decomposition of celluloses in the soil..... 57
Monohydric alcohols and phenols, Relation between the chemical constitution and germicidal activity of the..... 303

Neave, S. L., and Buswell, A. M. Note on the occurrence of bacteria in oil-well brine samples..... 133
New, A, apparatus for intermittent observations of physiological changes in cultures of microörganisms..... 125
Note on the occurrence of bacteria in oil-well brine samples..... 133

Oil-well brine samples, Note on the occurrence of bacteria in..... 133
Olives, A causative factor of "floaters" during the curing of..... 359
Orla-Jensen, A. D., Orla-Jensen, S., and Spur, Bernhard. The butter aroma bacteria..... 333
——, S., Orla-Jensen, A. D., and Spur, Bernhard. The butter aroma bacteria. 333
Oysters, Spirochaetes in Baltimore market..... 135

Parsons, L. B., and Douglas, W. F. The influence of sodium chloride on the colorimetric determination of pH..... 263
——, and Sturges, W. S. Conductivity as applied to studies of bacterial metabolism. II. Parallelism between ammonia and conductivity in nutrient gelatin cultures of putrefactive anaerobes..... 267
Peterson, W. H., Stiles, H. R., and Fred, E. B. A rapid method for the determination of sugar in bacterial cultures..... 427
Philbrick, Burton G. The rôle of starch in the cracking of chocolate creams. 275
Physiological changes in cultures of microörganisms, A new apparatus for intermittent observations of..... 125
—— Studies of accessory and stimulating factors in certain media..... 1
Putrefactive anaerobes, Parallelism between ammonia and conductivity in nutrient gelatin cultures of. Conductivity as applied to studies of bacterial metabolism. II..... 267

Pyle, Norman J. The bacteriophage in relation to *Salmonella pullora* infection in the domestic fowl ..... 245

Rapid, A, method for the determination of sugar in bacterial cultures ..... 427
Reith, Allan F. Bacteria in the muscular tissues and blood of apparently normal animals ..... 367
Relation between the chemical constitution and germicidal activity of the monohydric alcohols and phenols ..... 303
——, The, between the complement fixation and the skin reactive antigens of the tubercle bacillus ..... 355
Renal infection, Presentation of cases of, in which bacteriophage was used therapeutically. Bacteriophagy in urinary infection. Part I. The incidence of bacteriophage and of *Bacillus coli* susceptible to dissolution by the bacteriophage in urines ..... 203
Rivkin, Helen, Krasnow, Frances, and Rosenberg, Margaret L. A method of studying the availability of synthetic media for streptococci ..... 385
Rosenberg, Margaret L., Krasnow, Frances, and Rivkin, Helen. A method of studying the availability of synthetic media for streptococci ..... 385

Salmon, A bacteriological study of canned ..... 181
*Salmonella pullora*, The bacteriophage in relation to, infection in the domestic fowl ..... 245
Sanborn, J. R. Physiological studies of accessory and stimulating factors in certain media ..... 1
——. Physiological studies of association ..... 343
Schaffer, J. M., and Tilley, F. W. Relation between the chemical constitution and germicidal activity of the monohydric alcohols and phenols ..... 303
Sea-water, The concentration of, as affecting its bacterial population ..... 311
Silica gel plate, The use of, for demonstrating the occurrence and abundance of cellulose-decomposing bacteria ..... 87
Skin reactive antigens of the tubercle bacillus, The relation between the complement fixation and the ..... 355
Skinner, C. E., and Waksman, Selman A. Microörganisms concerned in the decomposition of celluloses in the soil ..... 57
Sodium chloride, The influence of, on the colorimetric determination of pH ... 263
Soils, The bacterial flora of serpentine ..... 315
*Spirillum Virginianum* Nov. Spec ..... 19
Spirochaetes in Baltimore market oysters ..... 135
Spur, Bernhard, Orla-Jensen, S., and Orla-Jensen, A. D. The butter aroma bacteria ..... 333
*Staphylococcus albus*, The genetic origin of, and *aureus* from common ancestral strains. Studies in microbic heredity. XI ..... 409
Starch, The rôle of, in the cracking of chocolate creams ..... 275
Stiles, H. R., Peterson, W. H., and Fred, E. B. A rapid method for the determination of sugar in bacterial cultures ..... 427
Streptococci, A method of studying the availability of synthetic media for .... 385
Studies in microbic heredity. XI. The genetic origin of *Staphylococcus albus* and *aureus* from common ancestral strains ..... 409

Sturges, W. S., and Parsons, L. B. Conductivity as applied to studies of bacterial metabolism. II. Parallelism between ammonia and conductivity in nutrient gelatin cultures of putrefactive anaerobes..... 267
Sugar, A rapid method for the determination of, in bacterial cultures..... 427
Sulfur compounds, A method for the study of the formation of volatile, by bacteria..... 319
Synthetic media, A method of studying the availability of, for streptococci... 385

Tamiya, Hiroshi. A new apparatus for intermittent observations of physiological changes in cultures of microörganisms..... 125
Tilley, F. W., and Schaffer, J. M. Relation between the chemical constitution and germicidal activity of the monohydric alcohols and phenols..... 303
Tubercle bacillus, The relation between the complement fixation and the skin reactive antigens of the..... 355

Urinary infection, Bacteriophagy in. Part I. The incidence of bacteriophage and of *Bacillus coli* susceptible to dissolution by the bacteriophage in urines. Presentation of cases or renal infection in which bacteriophage was used therapeutically..... 203
—— infection, Bacteriophagy in. Part II. Bacteriophagy in the bladder.. 225
Urines, The incidence of bacteriophage and of *Bacillus coli* susceptible to dissolution by the bacteriophage. Presentation of cases of renal infection in which bacteriophage was used therapeutically. Bacteriophagy in urinary infection. Part I..... 203
Use, The, of the silica gel plate for demonstrating the occurrence and abundance of cellulose-decomposing bacteria..... 87

Waksman, Selman A., and Carey, Cornelia. The use of the silica gel plate for demonstrating the occurrence and abundance of cellulose-decomposing bacteria..... 87
——, and Skinner, C. E. Microörganisms concerned in the decomposition of celluloses in the soil..... 57
Water of condensation, The so-called. The exudate from nutrient agar slants. 179
